## **ENGLISH AS A FOREIGN LANGUAGE**

We offer full-time courses to foreign students to develop their ability to use the English language for specific purposes.

When you arrive, you will take an entrance test to determine what level of English you already have. You will then be put into the appropriate level for study.

We offer modules of 3 months each:

*Elementary* – This course is designed for students who have basic knowledge of English but lack confidence to use it. The focus will be on getting a good foundation in grammar and word usage and to use English in practical situations

*Pre-Intermediate* – This pre-intermediate course builds on the skills introduced in the Elementary course. It is targeted at students with a working knowledge on English, but who need more practice to use it efficiently.

*Intermediate* – this course is a continuation of pre-intermediate level. It is intended for students who are fairly confident in English, but who need to further develop their 4 key areas of English.

*Upper Intermediate* – the focus of this level is a more in-depth study of grammar and vocabulary to help the students use English more accurately and fluently.

*Advanced* – This course is designed for students who wish to use English for academic purposes. It aims to raise the student's proficiency level to meet the more complex demands of academic reading and writing. At the end of this course, students may wish to proceed to prepare for Standard English proficiency test like TOEFL/ IELTS.

*IELTS /TOEFL Preparation* – whether it is for personal interests or wanting to go into a foreign university, this preparation course will give you the confidence needed to score high on your examination.
